

# Protecting mission critical data

APARA's backup solutions protect your critical data, provide consistent and reliable data protection while simplifying management of backup and recovery. From desktop to the data centre, our solutions combine the most reliable and cutting edge technologies making integration simple and easy.

## Bridging the gap

A proper data backup solution is the first step towards data protection. APARA's Data Protection Solution validates existing environments, their capabilities, understands new requirements and designs architecture that bridges the gap between requirement and result, with investment protection as the guideline.

In short, APARA is a one-stop organization from whom you can source all your requirements. From hardware and software to Consultancy. And since we understand your organization and your indispensable requirements like none other, we offer you solutions that will not only integrate these three components but also reduce risk and complexity, increase agility, ensure protection and aid in rapid recovery of information.

## World Class Value Adds

APARA possesses vast expertise in

technology and industry domains. This combined with the experience of having deployed multiple solutions enables us to offer effective business solutions to organizations.

- ▶ Possess second-to-none Intellectual capital and technology knowhow - through a decade of solution integration experience & domain expertise
- ▶ Expertise in design & deployment of multiple backup methods like LAN free backups, Server free backups, SAN backups etc., across heterogeneous platforms
- ▶ We follow a strategic delivery approach and a willingness to hold ourselves accountable
- ▶ Enjoy unique partnership with Storage Ecosystem companies
- ▶ Practice systematic and structured approach to services in each of the phases

APARA's Data Protection Solutions provides intensive protection for your information assets through streamlined, efficient information management and lower procurement costs. The gains? Optimum resource utilization. Sharp and improved business focus. And an ROI that goes straight to the bottom line.

### **Customer Centric Approach**

APARA follows a customer centric approach to solution design. One that is completely focused and one that delivers the desired results quickly, effectively and efficiently.

- ▶ Data Collection - Undertake Site Study, understand the business and technical needs
- ▶ Data Analysis - Relate business needs to technology and process
- ▶ Solution Design - Design the technical architecture and processes
- ▶ Product Positioning - Propose products to meet the requirement
- ▶ Implementation - Systematic and process based Implementation
- ▶ Support - SLA driven customized support plan

### **Delivering when it matters**

APARA's customer centric approach allows it to deliver an array of Data Protection Solutions that provides you with ▶ Backup architecture, sizing and best practices to meet your diverse business needs ▶ Provide documentation of recommendations, policies, standards and an implementation plan including tasks, time estimates, required services and resources ▶ Recommend and justify proposed architecture and best practices technically and financially ▶ Recommend alternate methods of infrastructure ownership to reduce the TCO ▶ Define a technology road map for organizations that meets diverse business objectives

### **Unbeatable Benefits**

- ▶ Enables organizations develop an efficient and effective data protection strategy
- ▶ Leverage the existing IT backup infrastructure thereby protecting investment
- ▶ Provides back up architecture that addresses long-term data archiving and restoration requirements
