

Streamlining your storage functions efficiently

How do you determine whether your current storage infrastructure is suitable for application requirements and meet business objectives? APARA's Storage Infrastructure Assessment Service examines the ability of existing infrastructure to meet availability, performance and utilization objectives and provides

recommendations for design and implementation that deliver better return on investment.

Comprehensive and enterprise-wide assessment

APARA Storage Infrastructure Assessment Services provide a comprehensive, enterprise-wide assessment and review of your existing storage infrastructure and operation. The features include recommendations to optimize storage management effectiveness. Through these services we can determine storage issues that are impacting your day-to-day business. Our architects will investigate, analyze and make recommendations on potential storage usage enhancements, upgrades and replacements based on the kind of storage you presently use. From DAS and SAN to NAS, iSCSI and more.

World class value adds

APARA possesses vast expertise in

technology and industry domains. This combined with the experience of having deployed multiple solutions enables us to offer effective Consultancy services to organizations.

- ▶ We possess second-to-none intellectual capital and technology know how - through a decade of system integration experience, domain expertise and vast resources.
