

Optimizing the WAN infrastructure

Industry segment – IT / ITES

The customer is one of the leading Software / IT services firm in India

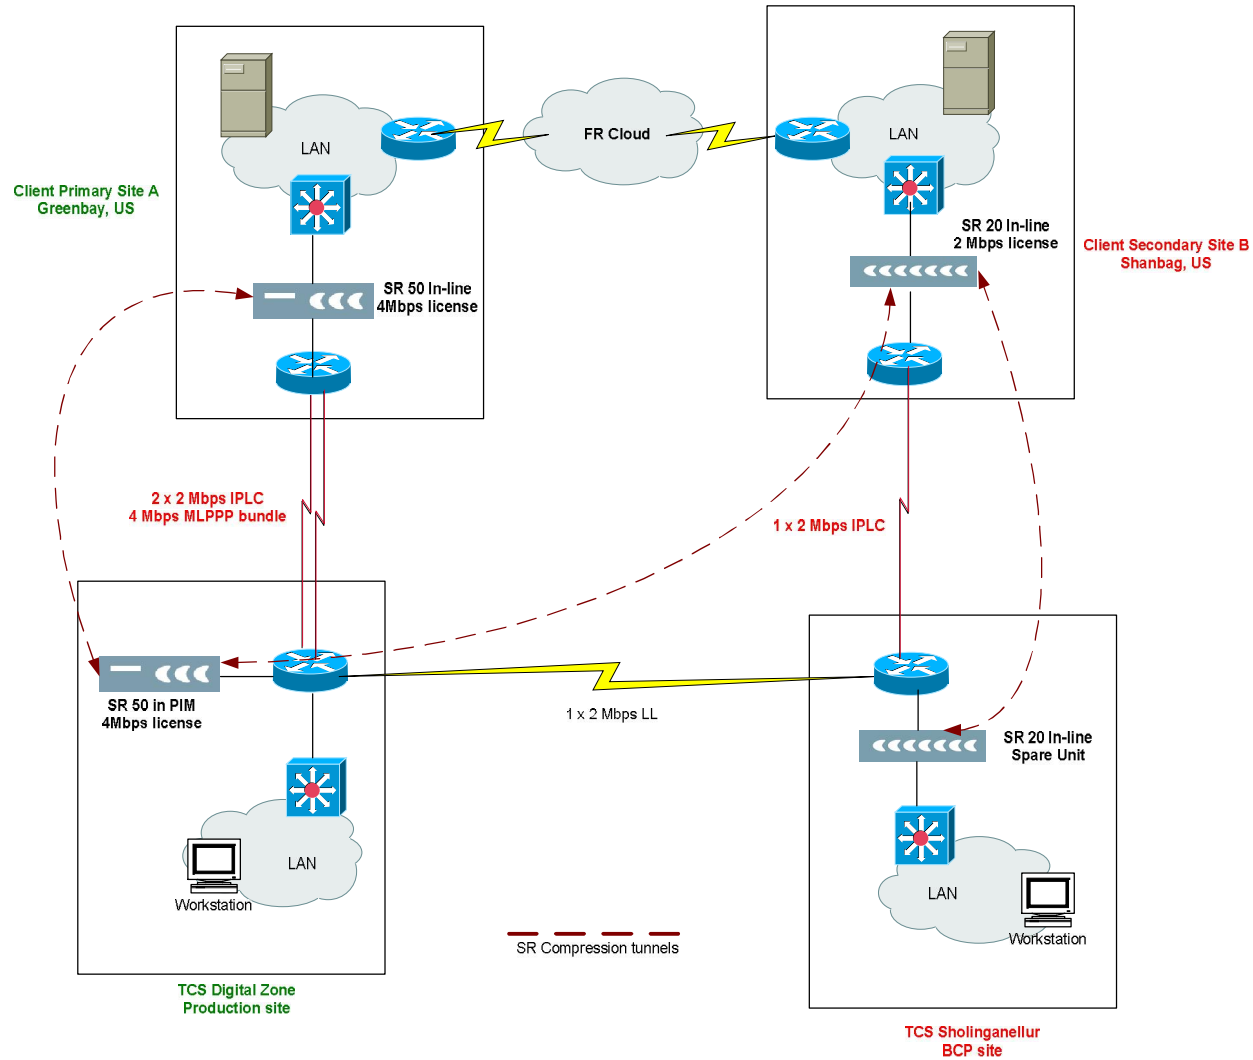

Solution Objectives

- Bandwidth capacity scaling of IPLCs to US client locations
- Accelerate production traffic like CIFS and Terminal Services
- Enforce QoS
- Traffic monitoring and capacity planning

Solution Highlights

- MSR/NSM combination for compression to scale bandwidth
- Application Flow acceleration as well as Packet Flow Acceleration for enhancing application performance
- Traffic flow monitoring for capacity planning
- Fully Mesh configuration for BCP
- Used Juniper WX platforms to deliver the solution

Architecture Blue Print

Solution Benefits

- Maximized ROI (< 6 months) in scaling IPLC capacity
- Enhanced QoS
- Improved application performance
- Better visibility and capacity planning
